"Do I have Carpal Tunnel Syndrome?" Disorders of the Hand, Wrist, and Elbow

Disorders of the hand, wrist and elbow are among the most common conditions seen in the doctor's office. One challenge for many physicians and patients alike is that a number of these ailments have many overlapping symptoms.

Please come join me and your neighbors to discuss many common disorders of the hand, wrist and elbow.

Among the conditions that will be discussed will be arthritis, carpal tunnel syndrome, tendonitis, trigger finger, tennis elbow and ganglion cysts.

RSVP: MondayNightattheMasters@gmail.com or sign up at the Front Desk.
